INSIDE HUNTING

Be aware of the federal rules on planting fields that draw doves in the fall. A rule frequently violated states that crops used to attract doves for hunting must be planted according to approved schedules.

Page 6

Turkey hunting was spotty this season, but with rains and a cool spring, "things are looking great" for future

Page 7

FISHING

Great fly-fishing action abounds as the bluegill spawn is occurring. The prolific bream can spawn from late spring to the end of the summer.

A catch of a different kind

WALL OF FAME: Co-owner Larrry Richardson shows some of the Billy Bass hanging from the ceiling of the Flying Fish Restaurant in Dallas. Photo by David J. Sams.

Eatery reels in popular fish plaque, memories

By Craig Nyhus

Remember the "Billy Bass?" Many of the singing, head-moving fish plaques have found a new home at the "Billy Bass Adoption Center" located at the Flying Fish Restaurants.

The first Flying Fish, a southern Cajun restaurant, began in Little Rock in 2002. Shannon Wynne, one of the owners, came up with the idea to "retire" the toys by hanging them on the restaurant wall. When the Flying Fish opened in Dallas' Preston Center in February of 2004, "the investors and family members hung

eight Billy Bass," said co-owner Larry Richardson

Richardson.

The craze took off from there, and now more than 300 "retired" Billy Bass grace the walls and are even

OFFSHORE VARIETY

THE CHASE IS ON: The $Island\ Queen\ II$, a party boat fishing off the jetties, is catching a variety of fish.

Party boats seeing more species caught

A greater variety of offshore species are being caught on party boats in the Gulf of Mexico this spring. With the reduced red snap-

With the reduced red snapper limits, reaching the twofish limit per customer has become an easier task. A new fad is developing this year — to the benefit of customers — as some of the ports' party boats

are moving around and chasing more and different fish.

The *Captain John* boat out of Galveston's Pier 19 reported, it had not seen any effect from the reduced snapper limit.

the reduced snapper limit.

HELPING THE TRINITY

Rural ranchers pitch in to aid river, wetlands

TRINITY TERRAIN: The North Texas Municipal Water District is constructing a massive wetland, above, or the Rosewood Ranch near Seagoville. The wetland is being constructed on the East Fork of the Trinity River, southeast of downtown Dallas. The system will filter sediment from the water after it is used and treated in the urban area. The headwaters of the Trinity River, at right, in Texas begin northwest of Dallas-Fort Worth near the Oklahoma state line. This scene is from Clear Creek, one of the river's forks in Montague County. Photos by Texas Agricultural Experiment Station.

Jim Cathey dipped a bottle into the Trinity River and held it up to the sun. The water was as murky as chocolate milk.

A few minutes later and a few miles away, he dipped another container into water from the Trinity that flowed through a manufactured wetland.

"It's like bottled water that you'd

find in a convenience store Cathey said.

Though the water wasn't ready to drink, its clarity helped Cathey prove a point to a visiting team of ecologists and researchers from the Texas Cooperative Extension. Wetlands naturally filter sediment and chemicals from the water, he said.

Cathey, an Extension wildlife specialist, and the team visited the Richland-Chambers wetlands this spring on a tour of the Trinity

They set out on the three-day journey to examine rural landown

ers' efforts to improve the river.

Cathey also is leading educational efforts for a state project to rehabilitate the river. The river is a primary water

source for 8.9 million residents, according to the water resources institute

With its headwaters northwest of the Dallas-Fort Worth area, the Trinity extends 512 miles to Galveston Bay. Nearly 2,000 miles of its tributaries drain 11.5 million

At Richland-Chambers, about 80 miles southeast of Dallas, two agencies have teamed up to rebuild more than 200 acres of wetlands to be used as a natural filter.
The agencies — Tarrant Regional

Water District and Texas Parks and Wildlife — intend to eventually restore wetlands on 2,000 acres in the Richland Creek Wildlife Management area.

There, water from the Trinity will

be pumped into the restored wet-lands. The water will eventually be piped into the Richland-Chambers

The river has suffered from decades of poor land management along its banks, Cathey said.

Ranchers and farmers cleared the land for cattle grazing and cotton long ago, he said. With few trees and other vegetation to slow storm water drainage,

runoff flows too quickly over the land and into the creek, eroding the banks along the way. Conditions are similar all along the Trinity.

The river also has been degraded by sewage and treated effluent from the

Dallas-Fort Worth area

'To say the

Trinity is

important is an

understatement.'

- Im Cathey

But communities and hundreds of other property owners along the river are counting on the state's effort to improve the Trinity's ecosystem and water quality. The plan, called the Trinity River Basin Environmental Restoration Initiative, was announced by Gov.

Rick Perry in September 2005. Two agencies of the Texas A&M University System are leading the river's restoration initiative. The Texas Water Resources Institute will coordinate urban projects. And the Institute for Renewable Natural Resources will manage rural efforts. Both agencies are units of the Texas Agricultural Experiment Station and Extension.

The state is also counting on help from property owners, Cathey said. They are able to do things the state cannot, such as reintroduce native plants and wildlife on private land

along the river.

They also can restore wetlands, which would help clean the river, he said.
"To say the Trinity is important is

an understatement," Cathey said. A Texas Agricultural Experiment Station and Extension report.

Free fish? Buyer beware

Guilty plea for sale of protected aquatic life

An Arkansas man has avoided potential felony prosecution by pleading guilty to two

Class A misdemeanors in Illinois. Rex A. Curtis, doing business as The Arkansas Fish Hatchery of Hot Springs, pleaded guilty in an Illinois courtroom to one count of attempted wire fraud and one count of unlawful offer for sale of protected aquatic life.

He was ordered to pay \$5,000 in penalties plus \$383 in court costs. He also was placed on six months conditional discharge.

In addition, Curtis also agreed to surren-

der any licenses he held with the State of Illinois, particularly the Department of Natural Resources, and forfeited all of his seized fish. Curtis also agreed not to do business or transport any aquatic life in Illinois

Arkansas Game and Fish Commission assistant chief of fisheries Don Brader said all fish from AGFC hatcheries are stocked into public waters of the state for recreational anglers. "In any case where someone is advertising free fish, we would encourage the reader to practice the old adage 'buyer beware' as very few things in this day and time are truly free," he said.

The Illinois case started in September 2005 when an investigator observed an ad in a local newspaper advertising "free fish" and "Florida strain largemouth bass."

A follow-up undercover sting operation resulted. A sampling of the suspected largemouth bass Curtis had imported were seized and tested at the Illinois Natural History Survey Lab in Champaign, Ill. The fish tested positive as a Florida-Northern large-mouth hybrid.

"These fish generated some concern in the biological community because Florida bass are a warm water bass and may bring in various parasites that could adversely affect our Nothern largemouth," said Tim Sickmeyer, Acting Chief of Investigations for the Illinois Department of Natural Resources. This is especially alarming in the wake of the ongoing battle the IDNR is having with LMV (Largemouth bass virus). All of the fish seized were destroyed so as not to risk con taminating native populations, Sickmeyer

"Mr. Curtis had advertised all over the State of Illinois promising free fish and bass ready for catching, which was not the case, Sickmeyer said. Curtis also had advertised grass carp, which requires a restricted species permit that he did not have.

The attempted wire fraud charge stemmed from Curtis' phone conversations with an undercover officer in which Curtis made claims about his fish that were not true. "Mr. Curtis offered free fish in his advertisement, but then informed would-be buyers it was a "buy one — get one free" offer," Sickmeyer "Mr. Curtis also would not let the consumer order what they wanted, but instead would tell the customer what he thought they needed, which was a substantially larger number of fish."

Curtis also claimed the fish would be ready to catch in a matter of weeks when in reality he was selling fingerlings that were about three inches long.

HUNTING

WHITETAIL BONANZA

Wallace Hughes, a winner in the Texas Whitetail Bonanza, holds the 10point, 130-pounder he shot in the South Texas Brush Country. Photo by Grant Hughes.

Texan, son on target Big Time

By Mary Helen Aguirre

Kevin Wallace Hughes of Spring started hunting at his dad's side in the '50s.

His father, said Hughes, especially loved to hunt squirrels and birds. By the age of 8 or so, Hughes had taken his first deer.

So when he was notified he had won a three-day white-tailed deer hunt for himself and a guest, it was a given he would invite one of his two sons.

Hughes was one of 10 winners of the Texas Whitetail Bonanza. The deer hunt is one of several Big Time Texas Hunts offered by Texas Parks and Wildlife each year by drawing.
It was his youngest son, Grant, 18, a com-

munity college freshman with free time in

Hughes has taken sons Nicholas, 21, and Grant camping, fishing and hunting since they were 4 or 5 years old.

"It's part of being a well-rounded person,"

Hughes said.

On a Tuesday morning, father and son drove about five hours to the Gates Ranch near Cotulla. The ranch, 30 thousand acres of South Texas Brush country that straddles Webb and Dimmitt counties, is home to such animals as white-tailed deer, javelina, feral hogs, quail and dove.

They were guided by Ernie Davis, owner of Cheyenne Outfitters, and David Synatzske. Davis has participated in the TPW hunts for about the past six years.

"They were very obliging. Very patient," said Hughes of the two guides.

By the next morning — about 30 minute after sunup — Hughes had his buck.
"The rut was going good. The deer were

moving. I watched them for 15 to 20 minutes," Hughes said.

When he spotted a 10-pointer, Hughes took aim with his Ruger 7 mag and took down the 130-pound deer.

Then Davis called them about a big buck and two does he'd spotted by a big knoll.

It was Grant Hughes' turn.

"The buck ran. My son dropped him at about 400 yards. It was a perfect shot,"

Hughes said.

Grant Hughes took the 150-pound buck with the Ruger his dad had bought him just

before their hunting trip.
"He grinned from ear to ear and then

See BIG TIME, Page 13

If you plant, dove will come, but

Be aware of federal regulations on where to shoot

Landowners in three East Texas counties are rethinking how they plant winter wheat on the eve of dove season.

If they don't, they could face citations from federal law enforcement

Texas game wardens and special agents from the U.S. Fish and Wildlife Service are teaming up to educate land owners regarding federal rules on planting fields that draw doves in the fall.

Jefferson County Game Warden Robbie Smith said the rules have been in place for years, but they weren't common knowledge in his county or in Liberty and Chambers

counties.
That became apparent recently when Smith and USFW Special Agent Jeff Odom filed a case against a Jefferson County landowner.

"All these farmers know each other and they started asking us, 'Hey, what's going on?'" Smith said. "So the U.S. attorney said to Jeff, 'Let's do a meeting on this."' 'Let's do a meeting on this.

The two law enforcement officers hosted the meeting May 8 in Beaumont

Speakers included agriculture extension agents from the three counties.

Also attending was Dr. Larry Redmon, a professor at Texas A&M University who specializes in forage issues for the Texas Cooperative Extension Service.

The speakers addressed a wide

range of issues, Smith said. For example, he explained, farmers commonly know hunters can

BAIT AND HUNT: Hunters and landowners should make sure recently plowed and seeded fields are legal hunting areas

Points of interest: Record-setting antlers on display in Waco

By Mónica Ortiz Uribe

Droughts tend to bring out the

worst of nature.

But when it came to receding water levels at Lake Waco two winters ago, drought conditions exposed a record-setting pair of deer antlers that can be considered

deer anties that can be considered a genuine wonder of nature. The antiers belonged to a mature nontypical whitetail deer. They are the largest antiers on record found in McLennan

County, according to the Boone and Crockett Club, the oldest hunter conservation group in North America.

The antiers were discovered in December 2005 by Cindy Parongao, a U.S. Army Corps of Engineers volunteer, while she was searching for a new fishing hole near the twin bridges area.

Land around the lake is protected from hunting, allowing deer to live longer and grow larger antlers, said Jerry Delgado, a Texas Parks and Wildlife game warden. The antlers are on display at the Lake Waco Wetlands Research and Education Center.

Keith Balfourd, marketing direc-tor at the Boone and Crockett Club headquarters in Montana, said the antlers were a "very significant" find.

Based on a set of thorough measurements by Boone and Crockett officials, the antlers scored 224 and two-eighths points, making them the 21st largest on record in the state of See ANTLERS, Page 14

Turkey hunts spotty, but future bright

Mother Nature setting stage for a promising 2008 show

BY CRAIG NYHUS

A poor hatch from last season after two years of drought hurt much of the public land turkey hunting this season, but prospects for 2008 are brighter.

prospects for 2008 are brighter.
On private lands, many hunters who took the time to scout, as well as spend extra hours and days in the field, were able to bring home a gobbler.

Reports from North Texas were good the first week of the season, but several storms, including the Easter storms, shut down hunt-ing success, and shut up the gob-

Ing success, and shut up the gob-blers for many. In South Texas, good numbers of adult birds helped make up for low jake numbers, and hunters reported good late-season suc-

Chip Ruthven is the area man-ager for the Gene Howe WMA near Canadian and the Matador WMA near Paducah.

"We had a youth hunt and a regular-season hunt at each," he said. "At the Gene Howe, one of the four youths killed a gobbler, and at the adult hunt, four of 18 hunters were successful."

Hunters fared better at the Hunters fared better at the Matador WMA. "We only had two youths, but they both killed a turkey. The regular season hunt had a 75 percent success rate, with 12 of 16 hunters killing a gobbler."

"We had virtually no reproduction let two?" Puthyon exid "Western Lett. was." Puthyon exid "Western Lett."

"We had virtually no reproduction last year," Ruthven said. "We didn't have any young birds, and no one reported seeing a jake."

Next years prospects are much different. "It's looking great now, he said. "We should see a lot of poults this year."

At the James E. Daughtrey WMA in McMullen County surrounding Choke Canyon Reservoir. two nublic hunts were held. voir, two public hunts were held. "We had 15 hunters at each of our youth and adult hunts, and our youth and adult hunts, and one hunter was successful at each," said Area Manager David Synatzske. "The last two years we had severe drought, but every-thing is really improved this year. We've had 18 inches of rain since September, and we have a lot of insects right now and more seed-producing plants."
Guided hunts and private land

hunters worked harder than in past years, but reported good results.

HAPPY HUNTING: A successful hunter leaves with his gobbler taken on an Atascosa County field

Paul Johnson of Vinegarroon Wildlife near Del Rio brought in 10 hunters this season, and each was successful. Johnson is happy with the new regulations that will open turkey season a week later in South Texas next year. "The first few weeks were tough, and most of the birds were henned-up," he said. "The sea-son really starts too early down here, but in the third week of the season things got real good. Now they're gobbling their heads

Johnson is also excited for next year. "We had a real poor hatch last year," he said. "But now we have forbs up to our knees and with the cool spring, things are See TURKEY, Page 12

FISHING

Fiesty fish in full spawn

Bring out the fly-rod, it's bream time

By Jon Wallace

Many fly anglers are daydreaming about their upcoming annual trout fishing trips to the mountains of Colorado or

the mountains of Colorado or New Mexico. But great fly-fishing action abounds right now in Texas as the bluegill spawn is occurring. Certain panfish are referred to as bluegill, redear (common-ly called shellcrackers), pump-kinseed redbreats green and kinseed, redbreast, green and longear sunfish, as well as warmouth (also called goggle-eye). Texans tend to lump all of these

fish together and call them

"When the water tempera-"when the water tempera-ture warms to near 70 degrees, panfish begin the process of procreating their species," said Tom Hungerford, fisheries biologist with Texas Parks and Wildlife. "Look for the telltale signs of differing colored spots in the shallows — one- to two-foot diameter indentions on

sandy or gravelly areas near weeds."
"Bream are a very prolific species and can spawn several times from late spring to the end of the summer,"

Hungerford said. "In Texas, large bream can readily be found on private tanks or small ponds located on area farms or ranches which can provide consistent action."

Bream also are found in abundance in area reservoirs, slower moving warm water streams, creeks and rivers, he said.

Fly-fishing offers the ability to scale your tackle down to offer maximum rod-bending action. "While most people that enjoy the sport of fly-fishing own a 5-weight fly rod outfit for their annual trout fishing

of New Boston (four bass, 12).
The top 50 pros and co-anglers based on year-end points standings will advance to the Texas Tournament Trail Championship Oct. 13-14 on Sam Rayburn Reservoir.

A FLW Outdoors report.

Goodwin-Towers team wins ACATS tourney

No wrapped boats and only a few fishing shirts with the ACATS logo approached the weigh-in station at the ACATS Federation tournament at Lake Limestone on May

Most of the contestants knew each other from past catfishing events.

The crowd, consisting mostly of family members and some local catfish anglers, seemed more concerned with getting some sun and seeing who caught the biggest fish than prize money.

A few boats came in early and empty. One boat struck a piece of metal and tore the hull. "We didn't know we hit anything," the angler said. "We thought the livewell was leaking, but it was fine — then we knew something was wrong. We were about an inch away from sinking it when we got in."

The team of Nick Goodwin and Joe Towers, both from Groesbeck, captured first place.

The team netted 40.60 pounds with their seven-fish limit, and also brought in the event's biggest fish, a 12.30 pound blue.

"We caught them early in the grass," Towers said. When asked the depth, he then held his hand just above his ankle. "About this deep," he said.

The fish were caught on shad. Second place was won by Roy Ewing and Earl Smith with seven fish totaling 28.13 pounds. From staff reports.

Shaw-VanDemark sink tourney field

Team led from wire-to-wire

While the majority of Wal-Mart FLW Redfish Series teams struggled in the finals with a variety of equipment failures, boater congestion and difficulties finding the key bite, the team of Kevin Shaw and Tadd VanDemark were having nothing

short of a career day.

After stumbling upon two nice schools of redfish during Friday's competition, the team ran into the tournament-fishing equivalent of a gold mine.

"Today we moved up to the

wake, and we suddenly saw about 1,000 schooling redfish," said Shaw, of Corpus Christi. "It was just unbelievable. The whole lake was red. (VanDemark) looked at me and said, 'Is that a bunch of grass?' I said, 'No, I think it's red-fish.'"

"On the first day we caught four fish, yesterday we caught seven, and today we just banged them," VanDemark said. "We just caught great fish today. At one point in the day, I looked

See REDFISH, Page 14

GAME WARDEN BLOTTER

ALL SIGNS POINT TOWARD DAMAGED MIRROR

• Edwards County Game Warden Cody Hatfield observed several road signs that had been knocked down by a vehicle. He was able to find a side mirror next to one of the signs and kept it as evidence. He went to the local high school and looked at the stu-dents' cars. He found one vehicle with considerable damage and missing the driver side mirror. The mirror found at the scene matched the mirror on the passenger side of the suspect vehicle. Hatfield inter-viewed the driver and passenger of the vehicle and received statements from each. A total of 21 signs and one deer had been run over. Cases pending.

WARDEN STAYS BUSY FILING 17 CASES IN TWO DAYS

•Henderson County Game Warden Audie Hamm checked some men from Dallas fishing from the bank of Cedar Creek Lake. Three of the four had no fishing license. One had an outstanding felony warrant, and was arrested and placed in the Henderson County Jail. A pontoon boat was also checked that had an expired West Virginia registration. Of the four people in the boat, two were arrested for outstanding warrants. One of men had four warrants totaling more than \$1,200. A total of 17 cases were filed over a two-day period.

FISH SURVEY RECORDS MORE

THAN 2,000 FEET OF GILL NET •Zapata County Game Warden Fernando Cervantes was assisting with a fish survey on Falcon Lake when they came upon some unattended gill net. Cervantes and Inland Fisheries Technician Jimmy Cordova seized approximately 700 feet of gill net. That night, Cervantes was patrolling Falcon Lake when he observed a vessel enter Texas waters from Mexico. After a short pursuit the vessel was abandoned by its

6-FOOT GATOR GOES TO PRINCIPAL

Phillip Wood responded to an early morning call from the Jasper night, a 6-foot alligator was found at the home of the principal of the

able to rope and remove the alligator from the principal's yard.

occupants on the Texas shoreline. A commercial fishing vessel from Mexico and approxi-mately 1,500 feet of gill net were seized.

CITATIONS SURFACE AT SIGHT

of FLOATING EMPTY BEER CANS

While patrolling Lake Ray
Hubbard, Rockwall County
Game Warden Jenny Simpson and Dallas County warden Gary Miller spotted a ski boat with several teenagers on the Rockwall County side of the lake. While approaching the boat, the wardens observed empty beer cans floating in the water around the boat. Further investigation revealed all of the individuals in the vessel were drinking with the exception of one male. Citations were issued for minor in consumption, littering and insufficient numbers of PFDs.

THIS ARREST WAS IN THE BAG

•Bell County Wardens Ronnie Langford and Shawn Moore were patrolling on Lake Belton when they checked some bank fishermen. As they pulled the boat up, Langford noticed one person go to a bag on the bank and place something in it. Langford asked for their fishing licenses. One man replied he did not have one. As Langford got closer, he could smell marijuana. After questioning, the man gave up the marijuana out of the bag. The man also had outstanding warrants in Bell County, and was arrested and placed in jail; cases pending.

TROTLINE DAY OPERATION CATCHES A BIG HAUL

•District 3 held a trotline day operation on Caddo Lake, col-lecting 5,000 feet of trotline

and 1,500 feet of gill net. Game wardens participating were Jarrod Bryant, Javier Fuentes, Jon Kassaw, Kirk Permenter, Jennifer Inkster, Lana Caraway, Leanne Winkenwerder and Captain Larry Hand.

RACCOON SALE ON INTERNET

DRAWS BIG RESPONSE, WARDEN Travis County Warden Cody Jones responded to a call about a person trying to sell baby rac-coons on the Internet on Craigslist. Jones responded to the ad but when he was con-tacted by the seller, he was told he was seventh in line because he had so much response to the ad. Jones then identified himself as a game warden, and the man brought him the last raccoon. Case pending and rac-coon turned over to a rehabili-

HUNTER WOUNDS SELF CROSSING BARBED WIRE FENCE

•Gonzales County Game Warden Jason Davis responded to a hunting accident in a rural portion of the county. The individual was walking across his property hunting varmints when he came to a fence. He leaned a loaded .22 rifle (not on safety) against the fence and attempted to cross. The barbed wire caught the trigger, and the man was shot in the lower abdomen. The victim is expected to make a full recovery. The man had completed Hunter

HAWK ATTACKS PRIEST, WARDEN **GETS LIFT TO SOLUTION**

•Milam County Warden Mike Mitchell responded to a wildlife situation that required an innovative solution. At the

Catholic Church in Cameron. the priest was attacked by a redshouldered hawk that was pro-tecting her nest in a nearby tree. The priest had to go to the hospital and get stitches in his head. The hawk remained a threat to the parishioners and the priests, so Mitchell was called and faced the task of procalled and faced the task of pro-tecting the wildlife and the people. He used the city lift-bucket truck to get him up to the nest and secure the fledg-ing hawks and relocate them to a rehabilitator so the female would leave the area. To prowould leave the area. To pro-tect himself, he wore the city dog trainer's padded suit and his ATV helmet and goggles. Although he was attacked twice, he was not injured, and three red-shouldered hawks were taken to a Williamson County rehabilitator.

BIG TROUBLE ON JOB SITE

•Polk County Game Wardens Chuck Cotton and Suzanne Cotton apprehended three people who had killed two deer on a job site. They also confessed to stealing two deer feeders. Case pending.

ABC'S? ... HOW ABOUT

•Marion County Game Warden Clay Willeford made an arrest for BWI on Lake O' the Pines. The man claimed to have a college degree, but when asked to recite the alphabet, he asked if there was something else he could try. The man refused the intoxi-

BOATER FLUNKS SOBRIETY TEST HANDS-UP

•Travis County Warden Cody

Jones was patrolling on Lake Travis when he stopped a boat for a water safety equipment check and found the driver to be intoxicated. When Jones administered the Walk and Turn portion of the field sobriety test, the man held his arms out shoulder-high and after several reminders to put them at his side, the man asked, "How do you expect me to keep my balance?" The driver refused to provide a breath sample, was arrested and placed in jail. Case pending.

WARDEN BRINGS BOATERS

SAFELY ASHORE BEFORE STORM •Refugio County Game Warden Raul Gonzales was returning home from the Fulton Elementary KidFish event and received a 911 call from the Refugio County Sheriff's Department concerning a stranded boat in Copano Bay. Gonzales hooked up his patrol boat and was able to find the distressed boaters shortly before nightfall and strong thunderstorms hit the area. Two people were brought in safely to shore.

BOY ASSUMED DROWNED FOUND ALIVE, RESCUED

•Warden Robert Levens re synded to a report of a 13-year-old boy who had drowned on Inks Lake. Levens arrived to find that the boy was alive and well after being rescued. The boy had been operating a small boat alone when the clamp-on swivel seat failed, throwing him into the water. The boat continued to circle the boy several times as its small outboard motor had no kill switch. The boy, who was wearing his PFD, managed to avoid being injured by the still circling boat until rescued. The boy's father and an unknown boater were instrumental in his rescue.

Fire ants

Continued from Page 1

Gainesville, Fla., are working on commercializing a naturally occurring virus that can kill off colonies of red imported fire ants.

"It's specific to fire ants. It's found in the population naturally," said Steven Valles, a research entomologist at the USDA research center.

Valles said the virus would probably be administered just like the fire ant bait people are familiar with now. If all goes well, the product could be available at home improvement stores in two to four years, he said

ment stores in
said.
"We've had six or seven companies interested" in developing a product, Valles said, adding the virus-based pesticide would be the first of its kind in the treatment of ants. Viruses are already commercially available to kill caterpillars, he said.

The virus, known as Solenopsis invicta virus-1, or SINV-1, has been

found in 20 percent of the red imported fire ant fields, where it appears to cause the slow death of infected colonies. Valles said the virus seems to kick in and cause death when the ants experience a stress, such as extreme cold or very wet conditions.

The trick will be to perhaps use an

The trick will be to perhaps use an irritant or increase the number of viral particles to make the virus lethal, he said.

All of this is good news for wildlife, livestock, hunters and ranchers.

nvestock, numers and ranchers.
For species that are particularly vulnerable — such as South Texas quail — fire ant control could help them rebound, experts said. Not only are fire ants known to kill quail chicks, but also they eat insects quail need to survive.

Fire ants are another nail in the coffin for quail, according to Dale Rollins, a professor and wildlife specialist at the Texas Agricultural Extension Service in San Angelo. So any kind of control that could help knock down the fire ant population would be beneficial. he said.

While Rollins said fire ants have

hurt quail, he pointed out that fire ants aren't the only factor in the quail's decline. Habitat changes such as the use of Bermuda grass instead of native grasses are also a culprit, he said.

Brad Dabbert, associate professor in the Department of Natural Resources Management at Texas Tech University, said his research showed that higher quail chick survival rates are possible if the area is treated for fire ants, but survival also depends on ant activity.

Some fire ants are more territorial and aggressive than others, he said. The less aggressive ants would tend to explain why quail appear to be present in some areas where fire ants are present. But like Rollins, Dabbert believes habitat is the key to quail survival.

As for fire ant control, the virus isn't the only biological weapon targeting the pest. Some naturally occurring pathogens and natural enemies found in South America are already in use and waging war against the ant here in the United States.

Scientists have released a protozoan, Thelohania solenopsae, that's spreading into Texas and other southern states on its own, according to David Oi, another research entomologist at the USDA center. The single-cell organism causes the ants to get sick and die.

ants to get sick and die.
Yet another weapon is the phorid fly, which has also been released in Texas, Oi said. Eggs from the fly hatch into maggots that bore into the heads of their ant hosts and feed on their brains.

These types of biological control can spread over a large area and work well in knocking down ant populations in difficult-to-treat terrain, he added.

"We're trying to add layers," Oi said. "Hopefully these things we're working on will be free — even in your backyards."

Fire ants were accidentally imported into the United States in the 1930s. The stinging insects are blamed for \$1.2 billion in damage in Texas and \$6 billion in damage nationwide.

Turkey

Continued from Page

looking great."

Chris Lee of Rocking L Outfitters guided hunters in Brooks County near Falfurias. "We had a good season," he said. "We didn't get the heavy rains during the season like they did in the Hill Country."

"We had one tough weekend — all the birds were henned-up or locked up. There was no sense hunting them early, so we didn't go to the field until nine o'clock and hunted all day."

and hunted all day."

Nearly all of his 25 customers had success. "Everybody had a close opportunity, but there were a few misses." he said.

nad success. "Everybody had a close opportunity, but there were a few misses," he said.

Lee said young birds were few and far between this season, but conditions bode well for next year. "We saw three jakes all season," he said. "But we have good vegetation and lots of bugs. Next year ought to be good."

Baiting

Continued from Page 6

shoot doves over seed crops that have been recently cut.

They just can't pick up the seeds and scatter them over another field to bait the doves.

But, Smith said, a rule that is frequently violated states that wheat fields used for dove hunting must be planted on schedules recommended by local extension agents. In the three-county area, that

In the three-county area, that means eight weeks before the first hard freeze or Dec. 1, and it should be either harrowed over or drilled into the soil.

Under that strategy, Smith said, the wheat should be planted the last week of September. Dove season generally opens the

Dove season generally opens the first week of September in Jefferson and Liberty counties and late September in Chambers County. In these counties, however, farm-

In these counties, however, farmers have been dropping seed much earlier to make the fields attractive to doves, Smith said.

"It's fine if they want to plant it that way," Smith said, "you just can't hunt over it. The state makes its rules based on the feds.

"We have to be inside their box when it comes to migrating birds and waterfowl."

Smith said the May 8 meeting went well.

"We got along good and we all shook hands at the end," he said, "although some of them may not have liked the message.

altitudgii some of titem may not have liked the message. "It's like anything that's an old habit. Maybe it's what their dads and their granddads taught them and it's all they know."

and it's all they know."

The U.S. Fish and Wildlife Service regulations point out that agricultural planting, harvesting or post-harvest manipulation must be conducted in accordance with recommendations of the Cooperative Extension Service with regard to planting dates and application rates, which vary in the different regions of Texas.

Brit Featherston, Assistant U.S. Attorney for the Eastern District of Texas, has prosecuted illegal baiting cases, although they aren't common. "Before you start hunting over a crop." he said, 'check with your local state agricultural agent or your game warden, federal or state."

Bream

Continued from Page 8

excursions, a 3-weight o-utfit can lend itself to being a lot of fun and sporting on large bream," said Dr. Norm Tremblay of Fort Worth, who recalled catching his first bream on a cane pole as a child. "This is a species enjoyed by young and old alike. When a large bream turns at a right angle to the pressure point of the line, these fish can feel like giants on very small tackle and light line."

Generally, a 7 1/2-foot to 9-foot 3X leader is strong enough to catch bream yet offers enough abrasion resistance where lots of structure and cover exists, Tremblay said.

Bluegill aren't picky eaters, and most trout flies will work. Bream eat the larval and adult stages of insects such as mayflies, damselflies, invertebrates, or terrestrials such as crickets, ants and grasshoppers.

grasshoppers.
Rick Pope, president of Temple
Fork Outfitters, said recommend-

'When a large bream turns at a right angle to the pressure point of the line, these fish can feel like giants on very small tackle and light line.'

- Dr. NORM TREMBLAY

ed flies include Miss Prissy Poppers, Bream Buster Bugs, Dave's Hoppers, Wooly Buggers, Black Gnats, and Mosquito patterns. Black and chartreuse are the preferred colors.

preferred colors.
"When angling for bream, make sure to cast your fly or lure beyond

the bed and retrieve it near or across the bed," Pope said. "The fish prefer shallow water and can easily be spooked. Bream also can take in the fly and exhale it very quickly when guarding their beds so don't hesitate on setting the hook."

When catch-and-release practices are used, bream often reach their full potential, with catches that are difficult to get your hand around.

Though bream make fine table fare, they can reach full maturity in regulated waters. "If anglers will only keep the fish they need and primarily harvest the males of the bream species, then a lake's fish population should stay in balance," Hungerford said. "The males are usually the ones that guard the nest and can be distinguished by a large hump on their head, as well as being more colorful than the females."

SMILES OF SUCCESS: Liz and Todd VanDenmark and Kevin Shaw with Barbara Vanmeter show the team's winning trophies and check. Photo by FLW.

Redfish

over at (Shaw) and said, 'The smartest thing we did all tourna-ment was when we quit fishing yesterday at 11 a.m. and left our fish alone for today." In the end, VanDemark and Shaw

recorded the only 17-pound stringer of the tournament, bringing their three-day weight total to 48 pounds, 1 ounce — four pounds heavier than the next closest competitor.

Ironically, VandDemark, from Key Largo, Fla., and Shaw had no intention of playing the sight-fish-

ing game at Port Aransas. However, after a routine check of a pool of baitfish during Friday's competition, the duo stumbled upon the first school of redfish they'd seen all week. In a manner of minutes, the two decided to abandon their longcasting techniques and switch to a sight-casting pattern.

Then, after landing a healthy 14-pound, 9-ounce stringer, they decided to lay off their quarry and save it for the finals.

"We didn't think we'd be sightcasting at all during this tourna-ment," said Shaw, whose team used a combination of DOA Cal Series baits and Cajun Thunder gold spoons to land the majority of their catch. "It was one of the last things on our minds. But it just goes to show you that you have to be versatile out here.'

The change in tactics paid big dividends, including a \$50,000 check for first place.

Rounding out the top five teams were Chief Tauzin and Clark Jordan, both of Pearland (six redfish, 44 pounds); Travis Holeman and Peter Young, both of Luling, La. (six redfish, 42 pounds, 14 ounces); Danny Adams and Scott Isbell, both of Rockport (six redfish, 42 pounds, 14 ounces); and Blake Pizzolato, of Montgomery and Dwayne Eschete, of Mandeville La (six redfish 37 pounds, 7 ounces).

Antlers

Texas since the 1830s.

To be considered as recordsetting in their category, non-typical whitetail dear antlers must score above 185, Balfourd

The largest antlers on record scored 333 and seven-eighths points and were found in St. Louis, Mo., in 1981.

INFRARED CAMERA: Stealth Cam's latest

offering is the **Prowler**, a dual lens digital video camera that allows users to monitor deer activity 24 hours a day. Nighttime images are captured through the use of infrared emitters that have a range of 50 feet. Among the camera's features: an adjustable video recording time of 5 to 90 seconds per triggering; a 2-gig external memory card slot; wide-angle coverage; and an iconbased screen. The scouting camera, which uses a 12V battery pack, costs about \$450. For information, call (877) 269-8490 or visit www.stealthcam.net.

EXTEND YOUR
SHOOTING
RANGE: Nikon's
Omega Muzzloading
Riflescope features the
company's new BDC-250 reticle
that provides aiming point
circles at 150, 200, 225 and
250 yards. The 3-9x40
"riflescope, whose compact size
makes it ideal for muzzleloaders, features five inches of
eye relief to accommodate magnum charge recoil.
Waterproof, fogproof and shockproof, it is available in the
Realtree all-purpose green camo (shown; about \$380),
silver and matte black finish. For retailers, visit
www.nikonsportoptics.com or call (800) 645-6687.

ICONIC RIFLE: Thompson/Center Arms has introduced the ICON, a bolt-action centerfire rifle. Initial models will be chambered in .22-250, .243, .308 and the new .30 TC cartridge. Among the ICON's features are a 24-inch, button-rifled match grade barrel; a 60-degree chambered crown designed to increase accuracy and durability; an Interlok system that provides a rigid and stable platform for securing the barreled action into the stock; plus more. The 7.5-pound firearm is available with a classic style American walnut stock with checkering. It comes standard with a three-round, single stack detachable magazine and will sell for about \$800. For dealers, visit www.tcarms.com or call (603) 330-5659.

HARD BAIT: Strike King's new Red Eye Shad Lipless Crankbait was designed by the company's national prostaff. The 1/2-ounce bait features VMC Vanadium cone cut hooks, 3D eyes and free-floating rattles that offer the action and sound that'll lure 'em in. Available in more than 20 color combination, it costs about \$5.50. For retailers, visit

www.strikeking.com.

BIG FISH TALES:
"Take Me
Fishing"
(Skyhorse
Publishing
Company;
\$24.95) is an

\$24.95) is an anthology of works by 50 writers — including

Tom McGuane, Joan McGuane, Joan Mulff and Dave Barry — who offer their take on fishing. The 288-page hardcover book features an introduction by Pulitzer Prize winner Howell Raines and a foreword by former President

Jimmy Carter. Proceeds from the sales of "Take Me Fishing" and "The Gigantic Book of Fishing Stories," (Skyhorse Publishing, \$24.95) will benefit the FishAmerica Foundation (the conservation and research foundation of the American Sportfishing Association). The books are available at Barnes and Noble and other booksellers.

Havalon Knives is a rugged little pocket knife for big game skinning that uses surgically-sharp disposable blades. The 2 3/4-inch stainless steel blade utilizes a snap-on design that makes it easy to remove or place on the handle. The Piranta is available in three styles: the stainless steel version (about \$45); the Piranta-Z (about \$40), which features a wider-grip black zytel tough plastic handle; and the Piranta Tracer-22 (about \$35), which accommodates the popular No. 22 surgical blade. For information, call (800) 638-4770 or visit www.havalon.com.

nave no filament to break when dropped or jarred and the halide bulb has a life span in excess of 2,000 hours. It is powered by a lithium ion battery. Available in 24W (15.25 inches long) or 14W (12.6 inches long), the AE PowerLight comes with a charger. It costs about \$320-\$400 (depending on the model). For retailers, visit www.aelight.com or call (541) 471-8988.

with FoodSaver's GameSaver Turbo.

The updated appliance now features a digital seal level display,
a wider sealing strip, two vacuum pumps and a touch pad control panel. Designed for
heavy-duty use, it can quickly vacuum pack and seal up to 50 consecutive packages.
The appliance (with starter kit) sells for about \$275. For retailers, visit
www.foodsaver.com or call (877) 777-8042.

SCALING THE WALLS: Billy Bass lining the walls and ceiling of the Flying Fish come in all shapes and sizes. Some are painted pink, have beads, wigs and are draped in the Texas flag. The "World Record Billy Bass sits in the center surrounded by wall-to-wall "buddies." Photo by David J. Sams

Billy Bass

Continued from Page 1

hung upside-down from the ceiling. The Billy Bass reached its height of popularity in 2000 and 2001. The

motion-detecting fish moves its head and sings songs like "Take me to the River" and "Don't worry, be happy"

when someone passes by.

"We had to take the batteries out of them though," Richardson said.
"Some of the young kids thought it was fun to push all of the buttons, making all of the bass talk at once.

But some of the customers didn't appreciate it.'

The idea is now a staple of the Flying Fish, which has additional restaurants in Garland and Memphis - with one soon to open in Fort Worth.

"Customers bring in the Billy Bass, fill out adoption papers and get a certificate — kind of like with the old Cabbage Patch dolls," Richardson said. "They receive a free catfish basket for the dona-

Men usually aren't the donors. "Almost all of them are brought by

women," Richardson said. "Most of them ask us to please get this out of their attic — or garage — or house, and they all tell us, 'If he comes looking for it, don't tell him it's here.'

Youngsters also bring them "They like the certificate — and the free catfish basket," he said.

Other Billy Bass have been donated in memory of an old fishing partner, or in honor of sons or relatives fighting in Iraq.

The numerous plaques have confused some customers. "One big-haired Dallas lady pulled up in a red Cadillac and tried to buy one here,' Richardson said.

Representatives from the manufacturer came out as well. "They brought us a talking deer," Richardson said. "But that didn't work out."

Some of the Billy Bass are painted pink, many have beads, some are draped in the Texas flag, some have wigs, and there are a few "skeleton" Billys. The "World Record Billy Bass" holds the center position.

The fishing theme holds forth throughout the restaurant. All employees wear fishing shirts with "We Catch and Release into Real Hot Grease" embroidered on the backs. "We started with employees wearing hunter orange caps," Richardson said. "And then a good customer, John Barnes, who is the president of a lure company, noticed and gave us all orange caps with the Strike King Lures' logo." The "Liar's Wall" is filled with

fishing photographs brought in by customers. "Many of these are brought in by fishermen who lost a fishing buddy," Richardson said. "When they come back in they say it brings back good memories."

Party Boats

lot of the customers learn what the limit is the morning they are on the boat.

Once the snapper limit is reached, the boat pursues other fish. "The customers like chasing the variety of fish," he said. "Take the Atlantic spadefish for example—when the customer can see the fish, see it take the bait, then the fish pulls like crazy, and they're good to eat - the customers

are happy.

"On Saturday we stopped at a buoy and three ling came into view, the largest being around 90 pounds. We didn't catch any of them, but everyone's heart rate went up." Last weekend's trips reported: Saturday — 83 fishermen — 91 snapper

to 12 pounds, 12 lane snapper, 12 trigger-fish, 12 blue runners, 1 Warsaw grouper, 1

gag grouper.
Sunday — 73 fishermen — limits of snapper from

6-11 pounds, 1 ling — 25 pounds, 1 small king-fish.

(Buoy station No. 42035, 22 nautical miles East of Galves-ton.

shows a water temperature of 76 5 degrees.)

shrimp boat, Photos by Patrick Lemire

"The water has been beautiful, a bit dirty "The Water has been beautiful, a bit dirt but flat calm," said Sandra Fudge of Woody's Sport Center in Port Aransas. Aboard the *Island Queen II*, anglers have been catching small blacktip and spinner

shark, a few red drum that average 25 inches, as well as gafftop, whiting and sand trout using dead shrimp and squid. The boat has been fishing the end of the jetties and inside the ship channel. As for snapper fishing on their offshore

PAT LARSON with a blackfin tuna caught on a shrimp boat drift

boats, "people are complaining about the new red snapper limits," she said. "It is making them mad because they are spending all that money, but they do get to go out and look for more fish." (Buoy station No. 42019, 60 nautical

miles South of Freeport, shows a 77-degree seawater temperature.) In the valley, Rick Legere of the Osprey 1

& 2 boats reported catches of red snapper from 18-20 inches with one 18-pounder caught recently. They have also brought in a 120-pound bull shark and a few kingfish.

Other species include dolphin, triggerfish, strawberry and gag grouper and one blackfin tuna.

Most of the fish are being caught on squid and herring and some MIKE RICHARDSON with a ling that hit a free-lined sardine behind a snapper are

nire. Snapper are being taken on jigs. "The seas have been calm, usually from 3 to 5 feet lately," Legere said. (National Data Buoy Center Station No. 42002 east of South Padre Island reports a water temperature of 82 degrees.)

WILD IN THE KITCHEN

Mexican Shrimp Pilaf

Makes 4 servings

Ingredients

- 1 (6.8-ounce) Package Spanish
- rice and vermicelli mix
 2 Tablespoons margarine,
- melted 2 Cups water 1 (14 1/2 -ounce) Can

- diced tomatoes, undrained 3/4 Pound large shrimp, peeled and deveined 1 Cup zucchini, chopped
- 1/2 Cup frozen whole kernel corn, thawed

 2 Tablespoons ripe olives,
- sliced a
- Tablespoons tortilla chips, crushed
- crusned
 1/2 Cup Cheddar cheese, grated
 2 Tablespoons green onion,
- chopped Jar picante sauce

Sauté rice in margarine in a large skillet until golden, stirring fre-

quently. Slowly add water, seasoning packet from rice, and tomatoes; bring to a boil. Cover; reduce heat to low and simmer 10 minutes. Stir in shrimp, zucchini, corn and olives; cover and simmer 5 to $10\,\mathrm{minutes}$ or until shrimp are pink and rice is tender. Transfer to serving bowl. Sprinkle with chips, cheese and onion. Serve with picante sauce.

Recipe from The National Fisheries

Institute, www.aboutseafood.com. **Sunshine Salad**

for sale to collectors; proceeds will be used to fund conservation education and aquatic restoration projects across America. "Wildlife Forever is pleased to

honor the talented young artists, educators and parents who make the State-Fish Art Contest a memorable event," said Douglas H. Grann, president and CEO of Wildlife Forever. "Together, we are using art to empower a new generation of conservationists. By sharing their fish art with family, friends and the general public, our young people are becoming ambassadors for the good steward-ship of fish and wildlife habitat."

Second place in the grades 4-6 category went to Jessica Zhuge of Pearland. Third place was won by Rama Imad of Houston. In grades 7-9, the second-place

winner was Amalie Arambula of Mabank. Third place went to Jesus Gudino of Pasadena.

In grades 10-12, Kenneth McDaniel of Angleton took second place and Tiana Hargrave of Athens won third.

Educators and students in Texas have embraced the State-Fish Art Contest. There were 570 entries from Texas, representing nearly one-fourth of the entries for the entire country.

A Texas Parks and Wildlife report.

Bring your gun home in pieces.

Our new Tuffpak takedown case provides the ultimate protection for takedown rifles and shotguns...with plenty of room for however many extra barrels you'd like to take along. 32" of inside length, and tough as nails outside. So your gun doesn't end up in more pieces than it was designed for.
